

Learning doesn't need a classroom it needs a positive attitude

Amir Moaref arrived in the UK in January 2019. One of the team members from This Way 4 English (TW4E) completed his assessment in January 2020 and was identified at Entry level 2. Amir joined the library class the following week, which he had to stop in March due to the covid-19 lockdown. He joined TW4E Zoom lessons in June. Amir is enthusiastic, keen and is a very disciplined individual. Due to his hard work and dedication to learning, he was admitted to Bradford College to Level 1 Maths & English. Amir studied the equivalent of 300 hours in a year, to reach level 1.

He is self-motivated and does not put limits on his learning resources. He is using YouTube to understand grammar, Ted talks to understand different dialects and accents and The British Council among among other websites for reading comprehension. Amir has already drawn up an action plan of his learning and progression. Once he has completed his Level 1 qualifications, he will progress to GCSE Maths and English, which hopefully will open many doors for him to embark on his chosen professional course. He is still attending Friday morning Zoom lessons.
